

What has the Holme Valley Parish Council Climate Emergency Action Plan Committee been doing to make the Holme Valley Carbon Neutral by 2030?

Carbon Saving

Waste & Resources

We have installed a water refill fountain by the public toilets to encourage people to reuse bottles for water and not buy new plastic ones.

The Repair Cafes takes place at Holmfirth Tech on the 1st Saturday of the month. Bring a broken item and the team will try and fix it rather than bin it!

Carbon Saving

Carbon Saving

Energy

Energy Audits for Holmfirth Civic Hall and Honley library that aim to identify ways to reduce energy leakage in our old buildings.

A Home Energy Savings booklet for people of the Home Valley to reduce their carbon footprint and save money on their energy bills.

Carbon Saving

Transport

Campaign to encourage people to cycle or walk for shorter journeys.

Bike racks to be installed around the valley for safe parking of bikes and scooters.

Electric Vehicle charging to be beta tested in the valley.

Working Partnerships

These are some of the many partners we have worked with to move closer towards our goal:

Carbon Saving

Environment & Land Use

A biodiversity survey on Cuddy's farm using drones is the first part of a bigger project to see how land is being used in the valley with a view to measuring its carbon footprint and identifying land for climate emergency projects such as meadows and tree planting.

Mobilisation

Live streaming events took place to inform the local community what various groups, individuals and organisations are doing to make the valley carbon neutral.

A new website was developed to inform the community and share events.

Carbon Saving

To find out how much or how the actions we have already taken have helped or will help to lower our carbon footprint scan the code.

If you have any ideas to help us reach our goal to be carbon neutral by 2030 get in touch!

COVID made this project challenging but also gave us quieter roads, cleaner air, more wildlife sightings in towns and a cacophony of birdsong.

Small individual changes can have a big impact if we work together.
